Future Proof your Food Business

Solutions for Growth, Compliance, and Efficiency

Microsoft

Food and beverage manufacturers face a balancing act: maintaining safety, staying compliant, managing inventory, and adapting to fluctuating demand – all while protecting tight margins.

Tracking allergens, ensuring traceability, and managing perishable goods can feel like an uphill battle, especially when supply chain complexity adds to the pressure. Nearly 80% of companies cite supply chain disruptions as their biggest challenge[1].

To succeed, operational efficiency is key – smoother processes mean less waste, lower costs, and higher profits.

ERP platforms like Microsoft Dynamics 365 Business Central simplify and streamline your operations, but food and beverage businesses need more than just standard solutions. That's where DynamicsFoodERP comes into play.

Features

DynamicsFoodERP enhances the robust capabilities of Business Central with industry-specific features tailored for food manufacturers. From compliance management to production optimization, it's designed to meet the unique challenges of the food and beverage industry.

Advanced Food Management
Streamline production with real-time data, efficient scheduling, and enhanced resource planning. Advanced tools help monitor inventory levels, manage shelf life, and automate repetitive tasks, boosting productivity and reducing waste.

Food Commodity Management
Ensure traceability and accurate financial management of commodities. Manage price fluctuations, control supplier agreements, and oversee commodity-related financial operations with integrated tracking and reporting features.

Food Accelerators
Speed up your time-to-market with pre-configured templates and workflows designed specifically for food production processes. These accelerators simplify your implementation, allowing you to quickly reap the benefits of a modern ERP.

Allergen Management
Stay compliant with regulations by managing allergens and ensuring accurate labeling. The system provides transparency across your supply chain, helping you track allergens from raw ingredients to final product.

Food Process Manufacturing
Manage complex processes like batch manufacturing and recipe adjustments. Business Central supports process control, quality checks, and multi-stage production to help optimize your manufacturing workflow.

Microsoft-Powered Security
Benefit from Microsoft's global, trusted security. With built-in protection, your data stays safe whether you're in the office or working remotely, allowing you to focus on growth without security concerns.

Features

AI-Driven Efficiency
Leverage AI to track recipes, manage orders, monitor production, and ensure quality control. Predictive insights help optimize processes, reduce waste, and enhance equipment performance.

Food Quality Control
Protect your brand by maintaining consistent product quality. Features like automated inspections, batch tracking, and real-time reporting help ensure every product meets your standards and regulatory requirements.

Item and Document Lifecycle Management
Simplify your operations by managing the lifecycle of products and associated documents. From inception to distribution, this feature allows you to track each item and its documentation through every stage.
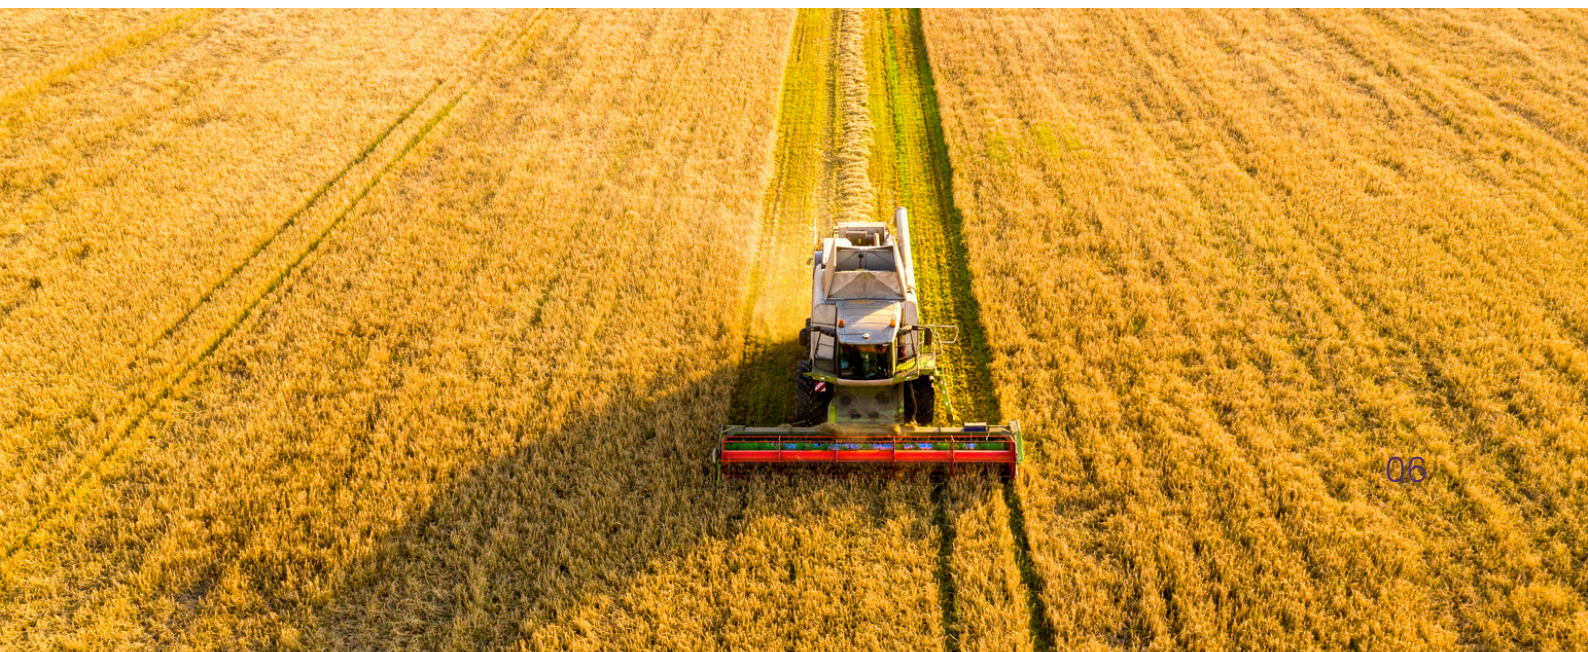

Food Warehousing and Distribution
Efficiently manage warehousing and distribution with tools for real-time inventory tracking, optimized picking routes, and streamlined logistics operations. Keep customers satisfied with timely, accurate deliveries.

Food Value Features
Enhance your value chain with robust inventory management, cost tracking, and integrated financials. This module enables better visibility into costs and profit margins while providing tools to reduce inefficiencies.

BC Anywhere
Access Business Central from anywhere with mobile-friendly features that allow your team to stay connected. This ensures your operations are running smoothly, whether you're on-site or working remotely.

Unmatched Expertise

With decades of experience, DynamicsFoodERP is built to tackle the unique challenges of the food and beverage industry. From complex supply chains to strict regulatory compliance, our solutions are tailored to meet your business's specific needs.

Proven Industry Expertise

Leverage deep expertise in Business Central to streamline production, manage inventory, and ensure food safety compliance. We help you boost efficiency and achieve real-time visibility across your operations.

In-Depth Knowledge

Our expert team knows Business Central inside and out, enabling us to tailor it to your business and support its growth through optimized processes and insightful data.

Personalized Service and Support

We don't just implement solutions—we build lasting partnerships. Our team provides ongoing support, system optimization, and training to ensure your ERP system continues to deliver value as your business evolves.

Innovative Solutions

Stay competitive with advanced analytics, custom enhancements, and strategic consulting. We provide the tools and expertise to help your business grow and thrive in a fast-paced industry.

Fixed Pricing, Zero Surprises

Our fixed-price quotes provide financial certainty, giving you peace of mind with no hidden costs or financial risks.

Our Proven Process

We've got you covered every step of the way. Our trusted approach ensures your project stays on time and within budget. Here's how we make your transition to DynamicsFoodERP seamless:

1 Discovery & Planning

First, your business goals and processes are evaluated to create a tailored implementation plan.

2 System Design

Business Central is configured to your specific needs, with seamless integration of any third-party apps.

3 Data Migration

Data is carefully transferred and validated, ensuring the system is fully ready from day one.

4 Training & Adoption

Comprehensive training equips your team to confidently use the system and maximize its potential.

5 Go-Live & Support

Hands-on support is provided throughout go-live, along with post-launch adjustments.

6 Continuous Improvement

Post-launch, we work with you to optimize and enhance the system for long-term success.

Let's Get Started

Upgrading your ERP system can feel daunting, but we make it straightforward and stress-free. Our goal is to help you take full advantage of the latest Microsoft innovations with a clear, transparent process.

Reach out today for a consultation, and let's build a roadmap to success together.
