LIBERTY GROVE SOFTWARE

Optimize every trip, every time

Your customers expect timely, accurate deliveries, but achieving peak efficiency in logistics can be challenging. Standard shipment processes in Business Central often lack the sophistication needed for truly optimized operations.

That's where LGS Food comes in, revolutionizing your delivery trips by seamlessly enhancing shipment organization, route planning, and stop management. All integrated effortlessly within your existing Business Central infrastructure.

Smarter Delivery Execution in Business Central

Delivery Trips play a key role in ensuring accurate, on-time deliveries across distribution operations. Without the ability to group shipments by day, route, or stop, coordinating efficient delivery runs becomes difficult. LGS Food fills this gap with intelligent features that streamline planning and execution.

With tools for route optimization, stop sequencing, and resource assignment, you gain full control over your delivery process. This helps ensure your goods arrive when and where they are needed.

Comprehensive delivery management features:

1 Delivery Trip Driver

Central page to manage drivers, including profiles, availability, and performance, enabling smart assignment and balanced workloads.

2 Delivery Trip Vehicles

Manage vehicles by availability, weight limits, and default drivers to ensure the right vehicle is used for each trip.

3 Delivery Trip Setup

Manage all setup functions related to Delivery Trips. Outbound orders must be assigned to a delivery trip document and all outbound orders must be linked to a trip stop.

4 Delivery Trip Routes

Define and manage delivery routes with assigned days, vehicles, and drivers to optimize resource allocation. Use templates to streamline planning, and allow flexible day-to-day adjustments.

5 Delivery Trip Stops

Define customer stops by ship-from location, including preferred stop numbers and delivery windows. Supports multi-location operations and powers the Delivery Trip Worksheet to auto-generate efficient, optimized delivery plans.

6 Delivery Trip Worksheet

Displays all outstanding orders and allows you to create one or many delivery trips.
